

The good data is narrower than the *story*.

A deep pass over the newly uncovered properties, from domain history to page-level analytics, with every useful sentence tied to a source.

Taqueria has the strongest new proof.

The other properties give us chronology, setup, or internal instrumentation: not a clean client-result story.

TAQUERIA / GSC LATEST 12 MONTHS 1,922 clicks 28 Aug 2025 → 27 Aug 2026. Search visibility, not sales.	TAQUERIA / CURRENT GA4 673 organic sessions Apr to Aug 2026 current property. 59.9% of 1,124 sessions.	NICE RIGHT / CURRENT GA4 259 sessions Instrumentation is alive. It is not outcome proof.
--	---	---

Recommended order

Taqueria first, after work-date matching. Nice Right's own numbers stay private. UXOXO and Dummy Reader remain chronology/context material.

GA4 PROPERTY 529974758

The funnel is instrumented.

What it does not say

No CRM join, booked-call validation, or client-result attribution is connected.

Current Nice Right homepage
Brave personal session · HTTP 200

GSC adds only 12 clicks / 619 impressions in its retained window. This is a baseline to improve, not a brag bar.

PROPERTY 529935066

A real launch trail. No traffic trail yet.

10 DEC 2025	Domain registration lower bound RDAP event. Not a work-start date.
25 MAR 2026	GA4 property + stream created Stream points to dummyreader.com.
2026-08-27	Historical report: zero rows No measurable GA4 result in the connected property.

Current Dummy Reader homepage
Brave personal session · HTTP 200

Safe claim
"Property and product presence were established." Not "the product generated demand."

It starts earlier. It also splits.

The first public capture predates the second GA4 property. The two measurement properties must remain separate.

LATEST 12 MONTHS

68,908 impressions · 28 Aug 2025 → 27 Aug 2026

Useful, not causal

Search visibility is a real outcome. We still need the work date and permission before attaching it to Nice Right. Configured conversion events produced no observed occurrences.

673

Organic Search sessions / current GA4 property

696

top query clicks: "taqueria la paz"

578

top query clicks: "la paz restaurants"

Measure the change. Don't invent the cause.

Lift is useful only when the baseline, comparison window, and confounders stay visible.

TAQUERIA / LEGACY GA4 YOY +233.3% adjusted sessions 1,250 → 4,166 after removing the 574-session Sailthru / email row. Raw lift was +279.2%; operator and traffic quality remain unresolved.	TAQUERIA / GSC MATCHED APR TO JUN +1.6% clicks 384 → 390 year over year. Impressions +6.7%; relative CTR −4.8%.	NICE RIGHT / GA4 FIRST 3 VS LAST 3 +198.5% average sessions 65 → 194. Median lift +121.4%; August supplies 80.4% of post-period sessions.
TAQUERIA / CURRENT MIX +24.1 pp organic share 49.6% → 73.7%, while equal-window average sessions fall 30.9%.	NICE RIGHT / ORGANIC SHARE −7.7 pp Organic Search share falls as total sessions rise; traffic lift is not search lift.	UXOXO + DUMMY READER Lift not estimable UXOXO has a property split. Dummy Reader has zero GA4 rows.

No causal lift is proven

No confirmed intervention date, untreated control, randomized exposure, or CRM/revenue join is connected.

Say exactly what the source can carry.

The strongest sentences after the caveats stay attached.

C1 · EVIDENCE-READY / PERMISSION + ATTRIBUTION CHECK Google Search recorded 1,922 clicks and 68,908 impressions for taquerialapazchicago.com from 28 Aug 2025 through 27 Aug 2026.
